About Client

Business Requirement

The client is a billion-dollar Internet service provider offering a wide range of digital media and cloud services for businesses.

Improve customer service and satisfaction by streamlining a few processes and building new channels.

- Develop backend communication channels and data processing modules
- The client had a legacy system which wasn't enough to achieve the new goals and work well with new features. Hence, they needed to re-engineer the legacy system that enables ideal customer experience management
- Develop and maintain the billing solution along with various transactional activities
- Need a partner to engage in end-to-end project life cycle across the spectrum

Our Solution

- Cloud-based solutions to migrate legacy applications to Cloud - Migrated all applications to AWS
- Upgraded native mobile application to cross-platform technology with React Native
- Integration with the legacy systems
- Rearchitected the Sitefinity framework for better conversion rates for online presence & digital marketing and A/B Testing for better conversion rates
- Implemented Test Rail & Postman for Automation Testing to make the application more robust and error-free
- Comprehensive billing engine with a complete user flow right from sign-up to billing

- Payment gateway integration
- Partnered with digital solutions for payment services such as bank transfer, credit card, direct debit, and inapp purchases
- Accelerator enabled early to market strategy for Blockchain-based digital signing solution
- Created reconciliation reports
- Compliance with GDPR, PCI, geo compliance, and HI-**TRUST**
- Prevent & mitigate frauds as part of security measures to ensure the confidentiality of customer's information, we leveraged Accertify [PCI DSS validated Level 1 & ISO27001 certified service provider]

Tools & Technologies

Key Features

- VAT functionalities to incorporate tax of respective European countries
- Support for diverse skills, roles in different geographies globally
- Producer-consumer approach through Oracle Advanced Queue
- Successful partnership for client's acquisition strategy

Business Outcome

The built solution reduced the operational cost by 20% and reduced hosting & maintenance costs

Reduced request processing time

Alignment with the client technology & modernization roadmap

Internalization of applications

IT process and application standardization

Over **150** concurrent sessions and **30,000** batch transactions

Omnichannel experience

Cygnet Infotech
